1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 6-7, 9-16, 19-20, 22-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Katz (Pat. No. 6,731,954).

Katz teaches an apparatus and a method for determining a directional of arrival (DOA) of a Radio Frequency (RF) signal transmitted by a remote unit in a wireless communication system including a plurality of antennas 112A, 112B of an antenna array configured to receive RF signal, a first DOA determinator 302A configured to determine a preliminary DOA, a coefficient selector (240; line 62+) configured to select a coefficient for the plurality of antennas, a signal modifier (204, 206, 208, 216, 116) configured to modify RF signal, a second DOA determinator 302B configured to determine DOA of RF signal.

3. Claims 4-5, 8, 17-18, 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
